

***PassITExam.com***

***Pass your MCSE, MCSA, MCDBA, MCSA, CCNA, CCNP, CCIE, SUN, Oracle, CISSP, HP, IBM, Novell, CIW, CheckPoint, CompTIA and more exams on your First Try!***

Vendor: Cisco

Exam: 642-524

Version: Demo

**PassITExam is the best choice for you as we provide up-to-date, accurate and reliable information, Questions with verified answers researched by industry experts; 100% Guarantee to Pass Your IT exam and get your Certification at the first attempt.**

# PassITExam – Industry Best 100% Pass Guarantee

**Important Information, Please Read Carefully**

## **PassITExam products**

1) Practice Questions & Answers (PDF format).

**Pass Your Exam at First Attempt with 100% Pass Guarantee**

2) Realistic Labs (not available for all exams)

3) Study Guide (not available for all exams)

Build a foundation of knowledge which will be useful also after passing the exam.

## **Latest Version**

We are constantly reviewing our products. New material is added and old material is updated. Free updates are available for ONE year after the purchase.

PassITExam practice exam helps individuals increase their understanding of exam objectives and become familiar with the testing format. PassITExam test questions have comprehensive questions, with verified answers researched by industry experts! We offer free demo for Microsoft [MCSE](#), Cisco [CCNA](#), [CCNP](#), [CCIE](#), CompTIA [A+](#), [Novell](#), [Lotus](#), [Sun](#), [Oracle](#), [HP](#), [IBM](#), [EMC](#) and more. We are the only one site can offer demo for almost all products.

PassITExam offers 24/7 support to our customer

**Q: 1** Tom works as a network administrator for the XYI company. The primary adaptive security appliance in an active/standby failover configuration failed, so the secondary adaptive security appliance was automatically activated. Tom then fixed the problem. Now he would like to restore the primary to active status. Which one of the following commands can reactivate the primary adaptive security appliance and restore it to active status while issued on the primary adaptive security appliance?

- A. failover reset
- B. failover primary active
- C. failover active
- D. failover exec standby

**Answer: C**

**Q: 2** For the following commands, which one enables the DHCP server on the DMZ interface of the Cisco ASA with an address pool of 10.0.1.100-10.0.1.108 and a DNS server of 192.168.1.2?

- A. dhcpd address 10.0.1.100-10.0.1.108 DMZ  
dhcpd dns 192.168.1.2 dhcpd enable DMZ
- B. dhcpd address range 10.0.1.100-10.0.1.108  
dhcpd dns server 192.168.1.2 dhcpd enable DMZ
- C. dhcpd range 10.0.1.100-10.0.1.108 DMZ  
dhcpd dns server 192.168.1.2 dhcpd DMZ
- D. dhcpd address range 10.0.1.100-10.0.1.108  
dhcpd dns 192.168.1.2 dhcpd enable

**Answer: A**

**Q: 3** Look at the following exhibit carefully, which one of the four diagrams displays a correctly configured network for a transparent firewall?

- A. 1
- B. 2
- C. 3
- D. 4

**Answer: D**

**Q: 4 What is the effect of the per-user-override option when applied to the access-group command syntax?**

- A. The log option in the per-user access list overrides existing interface log options.
- B. It allows for extended authentication on a per-user basis.
- C. It allows downloadable user access lists to override the access list applied to the interface.
- D. It increases security by building upon the existing access list applied to the interface. All subsequent users are also subject to the additional access list entries.

**Answer: C**

**Q: 5 John works as a network administrator for the XYI company. According to the exhibit, the only traffic that John would like to allow through the corporate Cisco ASA adaptive security appliance is inbound HTTP to the DMZ network and all traffic from the inside network to the outside network. John also has configured the Cisco ASA adaptive security appliance, and access through it is now working as expected with one exception: contractors working on the DMZ servers have been surfing the Internet from the DMZ servers, which (unlike other Company XYZ hosts) are using public, routable IP addresses. Neither NAT statements nor access lists have been configured for the DMZ interface.**

**What is the reason that the contractors are able to surf the Internet from the DMZ servers?**

**(Note: The 192.168.X.X IP addresses are used to represent routable public IP addresses even though the 192.168.1.0 network is not actually a public routable network.)**

- A. An access list on the outside interface permits this traffic.
- B. NAT control is not enabled.
- C. The DMZ servers are using the same global pool of addresses that is being used by the inside hosts.
- D. HTTP inspection is not enabled.

**Answer: B**

**Q: 6 In order to recover the Cisco ASA password, which operation mode should you enter?**

- A. configure
- B. unprivileged
- C. privileged
- D. monitor

**Answer: D**

**Q: 7 Which three statements correctly describe protocol inspection on the Cisco ASA adaptive security appliance? (Choose three.)**

- A. For the security appliance to inspect packets for signs of malicious application misuse, you must enable advanced (application layer) protocol inspection.
- B. If you want to enable inspection globally for a protocol that is not inspected by default or if you want to globally disable inspection for a protocol, you can edit the default global policy.
- C. The protocol inspection feature of the security appliance securely opens and closes negotiated ports and IP addresses for legitimate client-server connections through the security appliance.
- D. If inspection for a protocol is not enabled, traffic for that protocol may be blocked.

**Answer: B, C, D**

**Q: 8 Observe the following commands, which one verifies that NAT is working normally and displays active NAT translations?**

- A. show ip nat all
- B. show running-configuration nat
- C. show xlate
- D. show nat translation

**Answer: C**

**Q: 9 Multimedia applications transmit requests on TCP, get responses on UDP or TCP, use dynamic ports, and use the same port for source and destination, so they can pose challenges to a firewall. Which three items are true about how the Cisco ASA adaptive security appliance handles multimedia applications? (Choose three.)**

- A. It dynamically opens and closes UDP ports for secure multimedia connections, so you do not need to open a large range of ports.
- B. It supports SIP with NAT but not with PAT.
- C. It supports multimedia with or without NAT.
- D. It supports RTSP, H.323, Skinny, and CTIQBE.

**Answer: A, C, D**

**Q: 10 What is the result if the WebVPN url-entry parameter is disabled?**

- A. The end user is unable to access pre-defined URLs.

- B. The end user is unable to access any CIFS shares or URLs.
- C. The end user is able to access CIFS shares but not URLs.
- D. The end user is able to access pre-defined URLs.

**Answer: D**
